

Business **Feed-in Tariff** services

good
energy

Switch your portfolio for a reliable, personalised service from one of Britain's largest FIT administrators.

Fast, consolidated payments
straight to your account

Dedicated account management,
as well as digital self-serve options

Staggered site verification
to avoid payment interruptions

The Good Energy FIT B2B set-up is **designed for businesses** who manage large numbers of FIT accounts, unlike other FIT licensees who seem to just bolt it onto their domestic service.

Andrew Sunderland, Oxford City Council

Email fitbusiness-sales@goodenergy.co.uk to switch.
All you need is your generation number and address.

Earn more from your energy

Don't miss out on earnings – get paid more for **all** the energy you export.

SmartGen Portfolio

A more flexible, competitive tariff for generators with smart meters. Receive a market rate for new commercial solar installations

If you have an existing FIT portfolio, choose SmartGen Portfolio to receive market rates above the FIT export rate – with the flexibility to switch back to FIT if the market drops.

FIT smart export

Our customers export 60% of their power on average* – but on the deemed FIT rate, only get paid for 50%. If your sites have smart meters, switch to get paid for all the electricity you export.
